WHO WE ARE

Established in 2024 and headquartered in Al Khobar, Ocean Bridge Safety Services is a leading provider of breathing air compressors and customized breathing air cascade systems serving industrial and marine sectors throughout Saudi Arabia and across the Middle East.

We pride ourselves on delivering seamless technical solutions, supported by intelligent supply chain management, to meet stringent project timelines and enhance operational efficiency. Our completely dedicated team of OEM-certified engineers and specialists provides comprehensive support—from system design and customization to installation, maintenance, and ongoing technical assistance.

With deep industry expertise and a strong commitment to safety, quality, and reliability, Ocean Bridge is the trusted partner of choice for breathing air, marine, and safety solutions in complex and demanding environments throughout Saudi Arabia and the wider Middle East.

Global Network of Excellence

Ocean Bridge Safety Services partners with world-class industry leaders to deliver reliable, high-quality breathing air and safety solutions across Saudi Arabia and the Middle East.

Official Partner in KSA Quality Power Compressors & Safety LLC

Ocean Bridge is the official partner in the Kingdom of Saudi Arabia for Quality Power Compressors & Safety LLC, a trusted name in breathing air and safety solutions. We represent globally recognized brands including MAKO, Gardner Denver, and Reavell, offering reliable breathing air compressors, cascade systems, and after-sales services tailored for the oil & gas, marine, and industrial sectors.

Official Distributor of Muskwell Safety Tech Co.

Ocean Bridge is proud to be the official middle distributor of Muskwell Safety Tech Co., a globally recognized name in safety technology. This partnership strengthens our ability to deliver premium safety products and innovative solutions to our clients across key industries, including oil & gas, construction, and industrial services.

PRODUCTS & SERVICES

- BREATHING AIR COMPRESSORS
- BREATHING AIR LOOP SYSTEMS
- BREATHING APPARATUS
- GAS DETECTION SYSTEM
- PERSONAL GAS MONITOR
- MARINE & DIVING EQUIPMENT
- FIRE SAFETY EQUIPMENTS
- CONSUMABLES & ACCESSORIES

Breathing Air Compressors

Our Breathing Air Compressors provide reliable, high-quality breathable air for onshore, offshore, and plant facilities, ensuring safety in confined and hazardous environments. We offer comprehensive sales, service, and periodic or preventive inspections to keep your systems running efficiently. With tailored support and maintenance, we ensure uninterrupted protection for your workforce and operations across various industrial sites.

Breathing Air Loop Systems & Fill Stations

Our Breathing Air Loop Systems offer a complete package, including customizable design, manufacturing, installation, and commissioning, along with cascade containers and breathing air compressors for continuous, safe air supply. Tailored for onshore, offshore, and plant facilities, this full solution ensures reliable operation in hazardous environments. With expert service and support, we provide a seamless, high-performance system to protect your workforce across diverse industrial sites.

Breathing Air Cascade Racks

Breathing Air Station

Breathing Apparatus

We offer comprehensive sales, service, inspection, and maintenance for breathing air packs, including SCBA, SABA, EEBA, and ELSA systems. Our solutions are tailored to meet the needs of clients in both onshore and offshore facilities. Trust us to ensure your safety and compliance with industry standards

Gas Detection System

Our advanced Gas Detection System offers both wired and wireless solutions, delivering real-time monitoring of H_2S , LEL, SO_2 , and NH_3 gases with unmatched reliability. The fixed wired system ensures robust protection in hazardous environments, seamlessly integrating with your existing safety infrastructure for precise gas detection and immediate alerts. Meanwhile, our wireless system provides the flexibility of wireless connectivity, ideal for remote or challenging locations. Both solutions are designed to enhance safety, optimize operational efficiency, and ensure peace of mind in high-risk environments.

Personal Gas Monitor

At Ocean Bridge Company, we offer calibration, sales, service, and maintenance for both single and multi-gas detectors. Our team of OEM-trained technicians has hands-on experience with all major systems, including Honeywell, Industrial Scientific, MSA. We are dedicated to ensuring your gas detection equipment is reliable and compliant with safety standards, giving you confidence in every environment.

Marine & Diving Equipment

We specialize in the supply and servicing of marine and diving safety equipment, including life jackets, immersion suits, diving helmets, air compressors, and underwater communication systems. Our comprehensive services include inspection, maintenance, calibration, and certification—ensuring safe, efficient, and compliant operations in offshore and underwater environments.

- Supply of Safety Equipment
- Life jackets
- Immersion Suits
- SCBA sets
- Diving Helmets
- Air Compressors

FIRE FIGHTING SOLUTIONS

Ocean Bridge Fire Solutions provides expert fire safety and security services, including the installation, maintenance, and configuration of advanced fire protection systems. We serve commercial, residential, industrial, marine, onshore, and offshore sectors. Our team delivers reliable, customized solutions that meet safety standards and ensure maximum protection.

OUR EXPERTISE

- CO₂ Fire Suppression Systems
- Foam and Water Spray Systems
- Kitchen Fire Suppression Systems
- Fire Alarm & Detection Systems
- Fire Fighting Equipment Supply & Installation
- System Maintenance, Inspection & Testing
- Hydrostatic Testing & Refilling

Consumables & Accessories

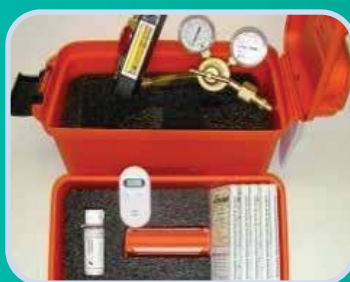

Ocean Bridge provides an extensive range of safety and fire-fighting consumables and accessories, tailored for onshore, offshore, marine, and industrial operations. From high-quality fire safety equipment to essential safety gear, our materials are sourced from trusted suppliers, ensuring durability, reliability, and compliance with the highest safety standards. Designed to perform in the most challenging environments, our products ensure your team's safety and operational efficiency.
